INSPIRE STUDENTS. PROMOTE STEM EDUCATION

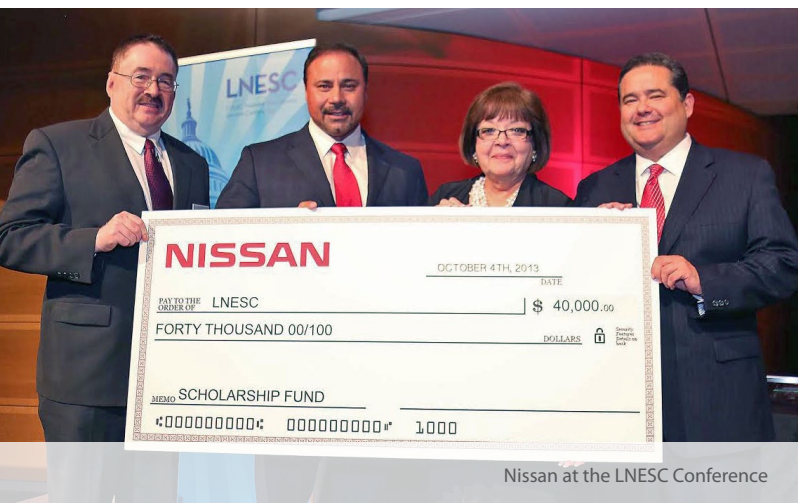

Futuro Students

At Nissan, innovation is what we do. From the zero-emissions Leaf to the redesigned Murano, we deliver an experience of excitement. We know the future of innovation is being imagined today in the minds of students and youth. Investing in the next generation of innovators and leaders is precisely what Nissan GEN I, Generation Innovation, is all about.

Today, young adults have tremendous opportunities to consider all of our societal needs and create innovative solutions to solve the challenges we face. The students of GEN I stand to make ground breaking discoveries at a faster pace than any other generation in history. NISSAN GEN I educational programs aim to close gaps to educational access, to inspire all students to think big and to create a community of support equipping students with skills needed to make their dreams and ideas a reality.

Innovation that Informs, Unites and Inspires.

Through the Nissan Gen I program we invest in programs that INFORM students of access to education and resources; in teachers, parents and mentors that UNITE to support student success, and in programs and opportunities that INSPIRE students to dream, think big and strengthen leadership skills.
